

TOTAL EYE CARE

837 West Castillo Ave. Belen, NM 87002
505-864-8992

Veatch Ophthalmic has been our equipment company of choice since 1995. In my office, it is my philosophy to have the doctor spend as much time explaining and treating the patient as possible. The products and instrumentation that I have put in place in my office with the help of Veatch, has made this easy.

We currently have the Huvitz refraction system. This system allows my technicians to perform a very accurate refraction. This makes my job very easy. When I enter the exam room, I simply refine the prescription, review the records and focus on the problem at hand. I have reduced my data gathering time dramatically. My patients benefit, because they get refracted 3 times, auto refraction, tech refraction, and my refraction. We have fewer Rx remakes than ever.

Veatch has made it easy to order everything needed in the modern Optometric office with their online store. We all know what we need and it certainly is not another appointment with a sales rep. The savings are built in if you are able to plug in a new instrument yourself. If you need, they do have a very knowledgeable service team to help with the hard things.

Please make Veatch a part of your business plan, you will like it.

Dan Dieterichs, OD
