

CAROLINA FOREST

FAMILY EYECARE

August 27, 2008

I have been using the Huvitz DRS-3100 since 2003. My shoulders no longer ache from reaching up for the Phoropter and it has a great "Wow" factor. My patients are really impressed by the technology. It has cut my exam time by about 5 minutes per patient, this increase in productivity allows me to see two more patients per day and increase my revenue by an average of \$400 per day! I recently sold the practice and I initially purchased the Huvitz technology for and have relocated to another part of the country. I have already purchased another Huvitz DRS-3100 for my new office, it is a great product and Veatch is a great company to work with.
